

The CPD RoadSeminar Tour 2010

Manchester	Wednesday, 10th March
Leeds	Thursday, 11th March
London	Thursday, 25th March
Glasgow	Wednesday, 12th May
Edinburgh	Thursday, 13th May
Coventry	Wednesday, 19th May
Newcastle	Thursday, 10th June
Plymouth	Tuesday, 22nd June
Bristol	Wednesday, 23rd June
London	Wednesday, 15th September
Southampton	Thurs. 30th September
Leicester	Wednesday, 6th October
Birmingham	Thursday, 7th October
Chester	Thursday, 21st October
London	Wednesday, 17th November

To find out more about these events and how else we can help you enhance your skills and knowledge, take a look at www.cpduk.co.uk

The CPD RoadSeminar Tour 2010

FREE CPD SEMINARS ON TOPICAL SUBJECTS

NEWCASTLE

Thursday 10th June

Marriott Hotel
Gosforth Park, NE3 5HN

Book now to make sure of your place

To ensure a place for the seminar/s you wish to attend,
book online at www.cpduk.co.uk
or complete and return the booking form inside

SEMINAR PROGRAMME & BOOKING FORM – NEWCASTLE THURSDAY, 10th June 2010 – MARRIOTT HOTEL, GOSFORD PARK

(Attendance at all the listed CPD seminars is FREE OF CHARGE, and delegates are welcome to attend as many sessions as they wish. Please complete one form per person)

TIME	SEMINAR ROOM A	YES ✓	TIME	SEMINAR ROOM B	YES ✓
9.30 - 10.25	SUSTAINABLE LIQUID FLOORING - from design to application. Seminar covers the origins of resin flooring and what makes them an attractive and flexible option for industrial and heavily used flooring areas. Discusses the sustainability of resin flooring systems as opposed to other flooring systems available, design benefits, installation and maintenance. RESIN SURFACES		9.30 - 10.25	BURNING ISSUES - THE HAZARD OF PAINTED WALLS AND CEILINGS. The problem of fire spread across painted walls and ceilings is becoming better understood and more widely acknowledged. Seminar discusses the problem, and the solution offered by flame retardant coatings in restricting flame spread in buildings. This is discussed in the context of changes to legislation as a consequence of the Regulatory Reform (Fire Safety) Order 2005, that applies to all non-domestic buildings and the requirement within it to carry out fire risk assessments. CROWN PAINTS	
10.35 - 11.30	ENERGY EFFICIENCY VENTILATION AND THE FUTURE. The Code for Sustainable Homes requires that from 2016 all new build homes will be Zero Carbon. To achieve this homes will need to be virtually airtight but to ensure a healthy environment the EST Best Practice Guide recommends the use of high efficiency, controlled mechanical ventilation in the form of MEV (Mechanical Extract Ventilation) units and MVHR (Mechanical Ventilation with Heat Recovery) units. ITHO VENTILATION		10.35 - 11.30	'HOLD-OPEN SYSTEMS' FOR SELF-CLOSING FIRE DOORS - A guide to the best practice recommendations of BS7273 Part 4. There is often a need to hold open self-closing fire doors. Seminar describes the systems available, relevant legislation, standards and best practice for specifiers, risk assessors and installers. GEOPFIRE (Part of the Stephenson Gobin Group)	
11.40 - 12.35	MICROGENERATION - THE LOW CARBON ROUTE TO COMBINED HEAT AND POWER. Seminar discusses how the cogeneration of heat and power offers the potential for significantly reducing CO2 emissions from both current and new buildings. Also covers the current developments in microCHP and how it can help meet the low carbon buildings programme. BAXI		11.40 - 12.35	A GUIDE TO NATURAL SMOKE VENTILATION. Seminar covers the importance of smoke vents, pressurised systems and other fire engineering principles, control systems and use of fire fighting shafts. Also discusses relevant comfort, roof access, maintenance, means of escape and roof light issues together with design considerations and a specifiers checklist. Includes case studies. BILCO UK	
12.45 - 14.00	EFFECTIVE SURFACE WATER MANAGEMENT. This seminar covers the factors requiring consideration when dealing with the collection, storage and dispersal of rain/storm water on building development and highways. On-site training facility for the practical demonstration of product solution applications. ACO TECHNOLOGIES		12.45 - 14.00	FIRE EVACUATION COMMUNICATION FOR DISABLED PEOPLE: The law and the solutions. Seminar discusses the various legislative duties to provide fire safety and evacuation for disabled people. Covers such issues as communicating with Deaf and hard of hearing people and the barriers faced by physically disabled people when placed in a refuge area. Also identifies the problems, legal responsibilities and technical solutions available to ensure an equally safe environment for everybody. DEAF ALERTER	
14.05 - 15.00	THE IMPACT OF BUILDING REGULATIONS (PART L 2010) - PREPARING FOR THE FUTURE. Seminar offers key preparation and guidance for the forthcoming regulatory updates affecting building energy efficiency requirements from Autumn 2010. The seminar discusses heating technology solutions to assist with compliance, the Code for Sustainable Homes and preparing for future regulatory developments. GLOW-WORM		14.05 - 15.00	POLYURETHANE WATERPROOFING & DECK COATING SYSTEMS. Seminar covers the basic chemistry, installation facets and benefits of elastomeric polyurethane systems and their use in protection of structures including parking decks and roofs. Relevant regulations and standards are covered and best practice guidance is given for specifications, installations and maintenance. Includes case studies. DOW HYPERLAST	
15.10 - 16.05	GRP ROOFING SYSTEMS: WHAT THEY CAN ACHIEVE. Seminar provides an overview of what can be achieved with GRP roofing systems and how they differ from alternative systems; including material safety; installation; new build and re-roofing; features and benefits of different roofing materials; requirements for heritage projects; case studies and considerations for the environment including water run off. HAMBLESIDE DANELAW		15.10 - 16.05	FACTORY ENGINEERED PRECAST CONCRETE CROSS WALL CONSTRUCTION FOR ACCOMMODATION PROJECTS. "Fast Build Rooms". A method of constructing accommodation units, using factory engineered precast concrete cross wall construction designed and manufactured to suit individual projects. This seminar has been designed to give a greater awareness and understanding of what can be achieved through off-site manufacturing. Case studies highlight the particular demands of each project. BELL & WEBSTER CONCRETE
